Marathon

500

A champion for challenging areas
and harsh environments

Marathon | 500

A champion for challenging areas and harsh environments

Marathon heritage: Experience fosters expertise

For more than 30 years our Marathon range has provided long term protection of structures in the harshest environments.

Introducing a champion – Marathon 500

Marathon 500 combines our accumulated experience with the latest advances in coatings technology, resulting in a high build, abrasion resistant product ideal for structures even in tidal/splash zones and other exposed areas.

Durable one coat protection

One high build coat provides a solid barrier to the environment, extending useful lifetime.

Turnaround time, along with associated costs, is reduced where high film thickness is required.

+ Strength to withstand harsh environments

Excellent abrasion resistance reduces the risk of mechanical damage, extending the lifetime of the coating.

+ Underwater curing

Marathon 500 is early submersion tolerant, making it ideal for structures and areas exposed to tidal water movement.

+ Limited surface preparation needed

Can be applied on previously coated surfaces subject to Ultra High Pressure Water Jetting, as well as power tool cleaning.

= A strong and enduring solution for harsh environments

The thick paint film coupled with high abrasion resistance makes a formidable barrier to its environment, preventing damages to the paint film and thereby nipping corrosion in the bud. Tolerance to less than ideal substrates coupled with underwater curing also mean the product is ideally suited to efficient maintenance of a wide range of structures.

Marathon 500 is a high build epoxy coating designed for harsh environments. It provides excellent abrasion resistance and is suitable for use in splash and tidal zones. The product is early submersion tolerant, allowing for underwater curing. It is also suitable for use on previously coated surfaces, provided they have been properly prepared. The product is available in a range of colours and can be applied to a wide range of substrates. It is a high solids product, which means it has a low VOC content. The product is also suitable for use in areas where there is a risk of fire or explosion. It is a high performance product that provides long term protection for your structures.

Engineered to withstand harsh environments and exceptionally well suited to maintenance of areas in the splash/ tidal zone

Industries	Examples of application areas
 Oil & gas	<ul style="list-style-type: none"> Splash zones Jackets Jetties
 Infrastructure	<ul style="list-style-type: none"> Pilings Offshore wind transition pieces
 Energy	<ul style="list-style-type: none"> Condensate boxes Caissons Water & waste water facilities
 Mining	<ul style="list-style-type: none"> Decks, walkways & topsides Helidecks

Marathon 500: Key features at a glance	
High build epoxy	Up to 500µm in one coat
Strong paint film	Excellent abrasion & impact resistance
High solids content	85% volume solids
Temperature flexible	Will cure down to 0°C
Colour choice	Range of colours available
Surface tolerant	Can be applied on surfaces subject to: Hydroblasting to WJ2 Power tool cleaning to St2 Dampness tolerant
Underwater curing	Will continue to cure underwater shortly after application

Marine and protective coatings offices worldwide

Legal Jotun entities world wide are listed. For details of Branch offices and Jotun representation in countries not listed, please visit jotun.com

AUSTRALIA
